

# **DASIS**

## **In South Carolina**

# **South Carolina Department of Alcohol and Other Drug Abuse Services (DAODAS)**

- ☀ Cabinet level state agency**
- ☀ Approximately 90 employees**
- ☀ We contract with 34 service providers for ATOD services**
- ☀ One service provider in each of SC's 46 counties**

# Uncertain Future

- ☀ **Several budget reductions**
- ☀ **Efforts underway to streamline state government**
- ☀ **DAODAS may be merged with the Department of Mental Health (DMH)**
- ☀ **Two Governors and 3 agency directors over the past 4 years**

# **Management Information and Research (MIR)**

- ✱ **A section within the Division of Administrative Services**
- ✱ **Responsible for DASIS**
- ✱ **In the last 4 years, MIR has been reorganized 3 times; reduced from 16 staff members to 12; from a division to a section**

# **Substance Abuse Agencies Management Information System (SAAMIS)**

- ☀ All service providers use the same windows-based client management software**
- ☀ Weekly diskettes are submitted by service providers**
- ☀ Includes intake, admission, transfer, discharge, follow-up and client services data**

# **Management Information Support Services**

**Our section within MIR is responsible for:**

- ☀ Processing incoming data**
- ☀ I-SATS & N-SSATS**
- ☀ Assisting service providers with error correction**
- ☀ Documentation – service providers users manual, specifications manual for software developers, DASIS crosswalks, etc.**
- ☀ Informing and training service providers when changes occur**

# **Notable Information**

## **☀ I-SATS**

**The Department of Health and Environmental Control licenses the state's substance abuse treatment agencies.**

## **☀ TEDS**

**SAAMIS only includes data from 34 contract agencies. Includes all clients served. Collecting, but not yet reporting discharge data.**

# Upcoming Revisions

## Client Outcome and Performance Measures

- ☀ Government Performance and Results Act (GPRA)
- ☀ Performance Partnership Grants (PPG)

It would be helpful if the departments within SAMHSA that are responsible for TEDS, GPRA and PPG could collaborate on needed measures

# **Examples of Discrepancies**

# Discharge Status

<b>TEDS</b>	Treatment Completed Left Against Professional Advice Terminated by Program Transfer to Another Program, but Client Did Not Report Incarcerated Death
<b>GPRA</b>	Completion/Graduate Left on own against staff advice with satisfactory progress Left on own against staff advice without satisfactory progress Involuntarily discharged due to nonparticipation Involuntarily discharged due to violation of rules *Referred to another program or other services with satisfactory progress *Referred to another program or other services with unsatisfactory progress Incarcerated due to offense committed while in treatment with unsatisfactory progress Incarcerated due to old warrant or charge from before entering treatment with satisfactory progress Incarcerated due to old warrant or charge from before entering treatment with unsatisfactory progress *Transferred to another facility for health reasons Death Other _____
